BULLETIN #57

Important Reminder to Clubs – Dressage Arena Sizes

Clubs are reminded that when conducting dressage competitions using the lower-level dressage tests, it is important to check the arena size specified at the top of each test. If the test states that it is to be ridden in a **20 x 40 metre arena**, then that is the arena size that must be used.

These tests have been specifically designed for a 20 x 40 metre arena. Using a larger 20 x 60 metre arena is not appropriate and can place some riders, particularly young and inexperienced competitors, at a disadvantage.

Riders may have practised their tests in the correct-sized arena, and being required to ride in a larger arena can be overwhelming and affect their confidence and performance.

Please ensure that the arena size specified on each test is followed so that all competitors are given a fair and consistent opportunity.

Thank you.

Ann Olsen
